

# Ethics of Care

## [Togetherness]

... cooperation is strengthened ...  
 for belonging to others, to a community,  
 to a place, to a territory  
 ... designing and building human settlements  
 with attention, concern, skills and tact

“In the most general sense, care [is] a species activity that includes everything that we do to maintain, continue, and repair our ‘world’ so that we can live in it as well as possible. That world includes our bodies, our selves, and our environment, all of which we seek to interweave in a complex, life-sustaining way.”

... Joan C. Tronto, "Caring Architecture", in Critical Care. Architecture and Urbanism for a Broken Planet (2019; 29).
